

COVID-19 update

March 11, 2020

With Reunion 2020 due to take place in April, the MONAT team continues to plan confidently for this event. Knowing how hard you have worked to qualify for Reunion, we currently have no plans to postpone or cancel this event.

The health and safety of our Market Partners is our top priority. This situation is changing daily, and we remain watchful while also focused on delivering this important event for our Market Partners. As we monitor the situation, we are mindful of sanitary, health and other preemptive measures in preparation for Reunion 2020.

We are in daily contact with our local event partners. Las Vegas remains open for business and no state of emergency has been declared for the Las Vegas area. We are also in regular communication with our transportation and destination teams supporting the event, as well as appropriate civil authorities, and we will update you should there be any change. If you have any concerns about your personal health, please contact your physician.

Collective responsibility

We believe in our collective responsibility to focus on the facts and to act with common sense and sound judgement, taking the advice of the relevant authorities including the Centers for Disease Control and Prevention (“CDC”). We encourage everyone to consult with their healthcare providers about their individual circumstances.

The information and links below are presented as general guidance and should not replace individual judgement and/or consultation with a physician.

What you should do

- Stay informed. CDC is updating its website daily with the latest information and advice for the public. (www.cdc.gov/ncov)
- Currently, there is no vaccine to prevent COVID-19 infection. CDC recommends routine preventive actions to help prevent the spread of respiratory viruses. These are everyday habits that can help prevent the spread of several viruses.

These actions include:

- Washing your hands often with soap and water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer.
- Avoiding touching your eyes, nose, and mouth with unwashed hands.
- Avoiding close contact with people who are sick.
- Staying home when you are sick.
- Covering your cough or sneeze with a tissue, then throwing the tissue in the trash.
- Cleaning and disinfecting frequently touched objects and surfaces.
